My I encourage you to visit my portolios at: <https://stillh.art>

## WORK EXPERIENCE

### Contractor at Florentino Ice Cream

September 2016 - December 2016

Planned and constructed an IT environment for the whole company. Designed and built a new website with a CMS and setup company mail accounts.

JavaScript | PHP | CSS

### Apprentice at Credit Suisse AG

August 2013 - August 2017

Worked on upgrading legacy database APIs, and introduced automated tests for internal and external websites.

Java | Selenium | PL/I | JavaScript

## Education

### B.Sc. Computer Science in Digital Ideation at HSLU

August 2017 - Present

Combines information technology and art. I have my major on game- and web design with extra courses computer graphics.

Expected Graduation in 2020

## PERSONAL PROJECTS

### GlühBär (Game)

Start: September 2017

A 2D game to learn the Unreal Engine process. I worked with three designers together and led our team.

- Complete Unreal code + Android port (planned iOS release)
- Complete sound-fx work
- Partial gameplay design
- Partial Illustrator design wok

### CodeWiki (Website)

Start: April 2016

A solution for programmers to share algorithms and explanations to code with fellow programmers. Alongside the base goal, I used the opportunity to learn more about the modern web stack.

- Complete node.js server code
- Complete automated build system (Grunt, SASS, Docker)
- Complete single page framework (sooner.js)
- Utilized MongoDB, Redis, ElasticSearch

## SKILLS

### Primary

JavaScript / GLSL (basics)  
Java / C++ / C#

Unreal Engine / Unity / Three.js

### Environments

Linux / Android  
Docker / Docker Compose  
MongoDB / MySQL

Git / Maven / Trello

### Tools

Intellij / Atom / nano  
Gradle / Grunt  
Gimp 2 / Illustrator / Lightroom

Cinema 4D

### Miscellaneous

3D Math (matrix calculations)  
3D Modeling (basics)  
Can do / Energetic -attitue

## HOBBIES

- Most of all I enjoy camping and exploring nature as a means of leaving my computer behind and enjoying a simple, less complicated, life. Just for a while at least.
- Taking on code challenges like one finds at Hackingtons, StackOverflow and CodePen. Next to that love teaching some of my knowledge to others and having discussions about algorithms especially since that is how I learned to code.
- I do further quite enjoy taking on activities with friends like motorcycling, bouldering (climbing) and most of the things I get a chance to experience.
